Education

UNIVERSITY OF CENTRAL PUNJAB Lahore, PK

BS in Software Engineering Nov 2021 - July 2026

Relevant Coursework: C++/JAVA(Programming Fundamentals, OOP, DSA), Web Engineering, DevOps, Automated Software Testing

PUNJAB GROUP OF COLLEGES Lahore, PK

Intermediate in Computer Science Sep 2019 - July 2021

About Me

My name is Madni Kumboh. I graduated from University of Central Punjab. I am passionate about technology and enjoy learning new things, especially in programming and web development. I have skills in C++ (OOP/DSA), Java, databases(SQL), and full-stack web development (HTML, CSS, JavaScript, PHP, Node.js, MongoDB, Express, Bootstrap, tailwind CSS, ReactJs(basic)). I also know the basics of DevOps and Automated Software Testing. I recently started my journey in Artificial Intelligence, focusing on Python, Natural Language Processing (NLP), and Large Language Models (LLMs) , aspire to expand my knowledge in AI and Machine Learning. I see myself as a curious learner who likes solving problems, I took a Lead Role in teamwork, exploring new fields, and creating useful projects

Projects

Appartment Reservation System MERN

- Built using html, css, Express.js, Node.js and MongoDb for efficient apartment booking and management. The system supports Admin, Staff, and Clients, enabling admins to manage Appartments, bookings, staff, and reports; staff to assist with bookings; and clients to browse, book, and track their reservations.
- It includes authentication & role-based access, room and booking management, client profiles, payment integration, and reporting/analytics, with a responsive frontend in HTML/CSS.

Techify Pakistan Ecommerce Website

- Built using HTML, CSS, JavaScript, Php, BootStrap for dynamic content management and efficient product handling Inspired From Xiaomi Pakistan Website.
- Includes Admin Panel for product listing, management, login/logout, and User Side for browsing, exploring products, and viewing details with a smooth navigation experience.

Zaraluna & SuperKids Clothing Website

- Developed a responsive e-commerce clothing website using React.js and Tailwind CSS, featuring modern UI, product browsing, and a seamless shopping experience.
- It also Includes Admin Panel for product listing and User Side for browsing, exploring, and viewing details with a smooth navigation experience.

Library Management System Using C++ DSA

- Built Library Management System to manage books in a library by using linked list to store book information and perform operations like adding, searching, and deleting books.

University Management System C++

- A Desktop application developed in C++ to manage student records and academic operations.

Currency Converter with UI/UX JAVA

- Console-based app that supports multi-currency conversions (USD, EUR, GBP, PKR, INR, etc.), exchange rate management, input validation, replay option, help menu, predefined/static rates, and user-friendly messages for smooth interaction.
- Developed in Java using OOP and Procedural Programming concepts, with a scalable structure for future enhancements and robust error handling to ensure accuracy and reliability.

Leadership and Activities

Akhuwat UCP (VIS) Lahore, PK
Volunteer September 2025

- Donating ration items, packing & submitting boxes, preparing them for transport, & distributing them to flood affected families.

Univerity FYP & Other Projects/Assignments

- I am Serving as a team leader in my FYP project, managing teamwork and also contributed as a leader to various assignments & projects.

Skills & Interests

Front-End: HTML, CSS, Bootstrap, JavaScript, tailwind css, ReactJs
Back-End: PHP, Node.js, Express.js
Programming Languages: C, C++, Java with (OOP & DSA)
Database: MySQL, MongoDB
Tools & Platforms: Git & GitHub, VS Code, Postman, RESTful APIs, My SQL WorkBench, SQL Server Management Studio, Intellijea, Eclipse IDE, MongoCompass
Software Testing: Automated Software Testing, Debugging & Testing

Interests: Photography, Graphic Design, Art, Chess, Travelling
